Summary

A passionate Full Stack Developer with 2+ years of experience in developing and maintaining scalable web applications. Skilled in Angular, Node.js, and TypeScript, with a focus on writing clean, maintainable code and improving performance. A self-taught developer recognized with Outstanding Awards in Zuitt Capstone Projects 1, 2, and 3.

Skills

Angular v13 & 17 ReactJS Node JS Express JS JavaScript TypeScript MongoDB Nginx Docker
HTML 5 CSS 3 Bootstrap Tailwind SASS AWS S3 Bucket Jenkins Git Version Control

Experience

JR Full Stack Developer

Leisue Inc.

May 2023 – Jun 2025

BGC Taguig

- Developed and maintained a scalable, real-time queuing system using the MEAN stack (MongoDB, Express.js, Angular, Node.js).
- Designed and implemented key features such as appointment scheduling, advertisement management, and support modules using Angular (v13–v19), leveraging RxJS and standalone components.
- Improved operational efficiency and user experience by building an appointment-based queueing system that reduced wait times.
- Built a centralized advertisement management system that synchronizes content across multiple branch devices (kiosks and TVs), ensuring consistent and up-to-date displays.
- Developed a support module to efficiently manage and resolve client issues, enhancing response time and customer satisfaction.
- Integrated WebSocket for real-time communication of appointment requests and configured Cron Jobs for automated tasks such as reminders and system maintenance.
- Implemented backend services using Node.js and TypeScript, applying SOLID principles for scalable and maintainable architecture.
- Containerized backend services using Docker and Docker Compose to streamline deployment and service management.
- Collaborated with cross-functional teams through code reviews and Agile methodologies to ensure code quality and continuous improvement.
- Utilized GitLab for version control, enabling efficient collaboration, secure code management, and streamlined development workflows.

MERN Full Stack Web Development Bootcamp Trainee

Zuitt Learning Institute Inc.

Oct 2023 – Nov 2023

Remote

Capstone Project 3 – Full Stack MERN Application (MongoDB, Express, React, Node.js)

- Developed a full stack application with secure authentication (login and registration) using JWT
- Implemented **admin features**: manage users, products, orders, carts, and payments (create, read, update, delete, archive/unarchive)
- Built **user features**: product ordering, cart management, order tracking, and quantity updates
- Deployed the application using Vercel and Render

Capstone Project 2 – Backend Web API (Node.js, Express, Postman)

- Built RESTful APIs with user authentication and authorization using JSON Web Tokens (JWT)
- Implemented CRUD operations for users, products, orders, carts, and payments

- Deployed backend services using Render

Capstone Project 1 – Frontend Web Developer Portfolio

- Developed responsive web pages using HTML5, CSS3, Bootstrap, and JavaScript
- Deployed the portfolio on GitHub to showcase projects online

IT Staff

Moriroku Inc.

Nov 2017 – Aug 2021 Binan Laguna

- Networking Protocols: Learn about TCP/IP, DNS, DHCP, VPN, LAN/WAN technologies, and more.
- Hardware: Gain experience with routers, switches, firewalls, servers, network cables, etc.
Support client request for technical issue such as application, hardware, software and internet issue.
- Software & Operating Systems: Familiarize yourself with different OS (Windows Server, Linux) and their respective network configurations.
- Troubleshooting: Develop problem-solving skills in diagnosing and fixing network-related issues, such as connectivity problems, server failures.

Education and Training

Zuitt Learning Institute Incorporated

Postgraduate/ Certificate Course

October 3, 2022 – November 21, 2022

Asian Institute of Computer Studies

San Pedro City, Laguna

Diploma in 2yrs Computer Technology

June 2014 – April 2016
